

Do you like a led light that can your owned design ?

It may be the only one of shape in the word !

I think the client will be interested in decoration their offices, stores or rooms with creation of LED Linear Light.

See some “shape” as examples

You may be difficult and confused on drawing, because people don't know how to have a drawing.

We can help the CAD drawing, just let us know the dimension of your space you.

Length ?

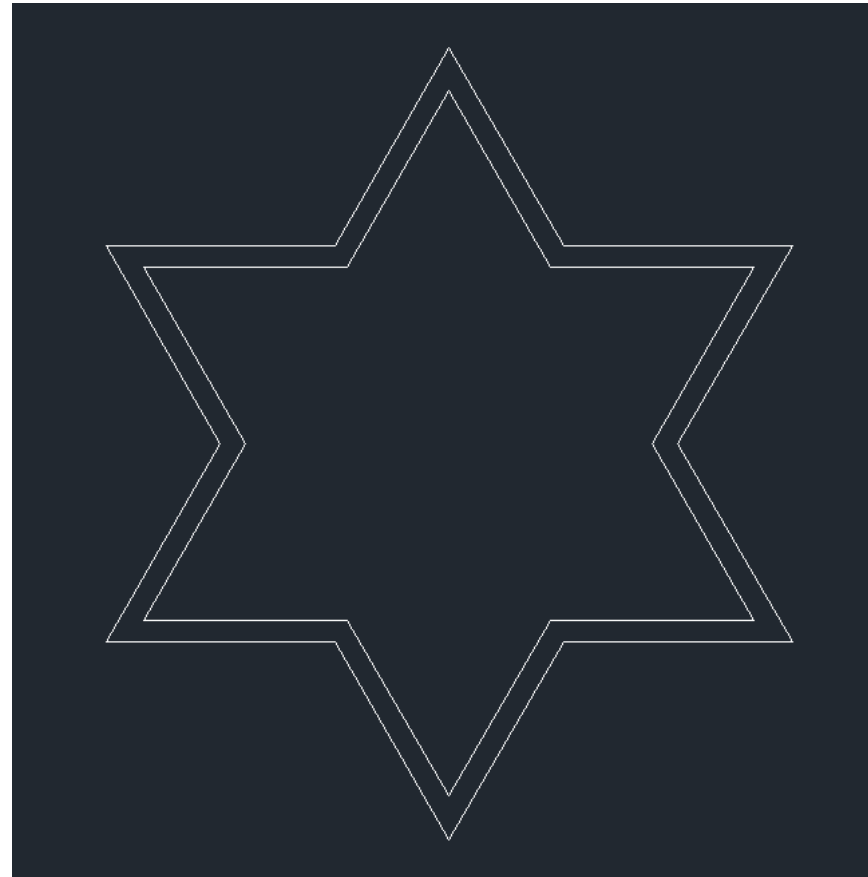

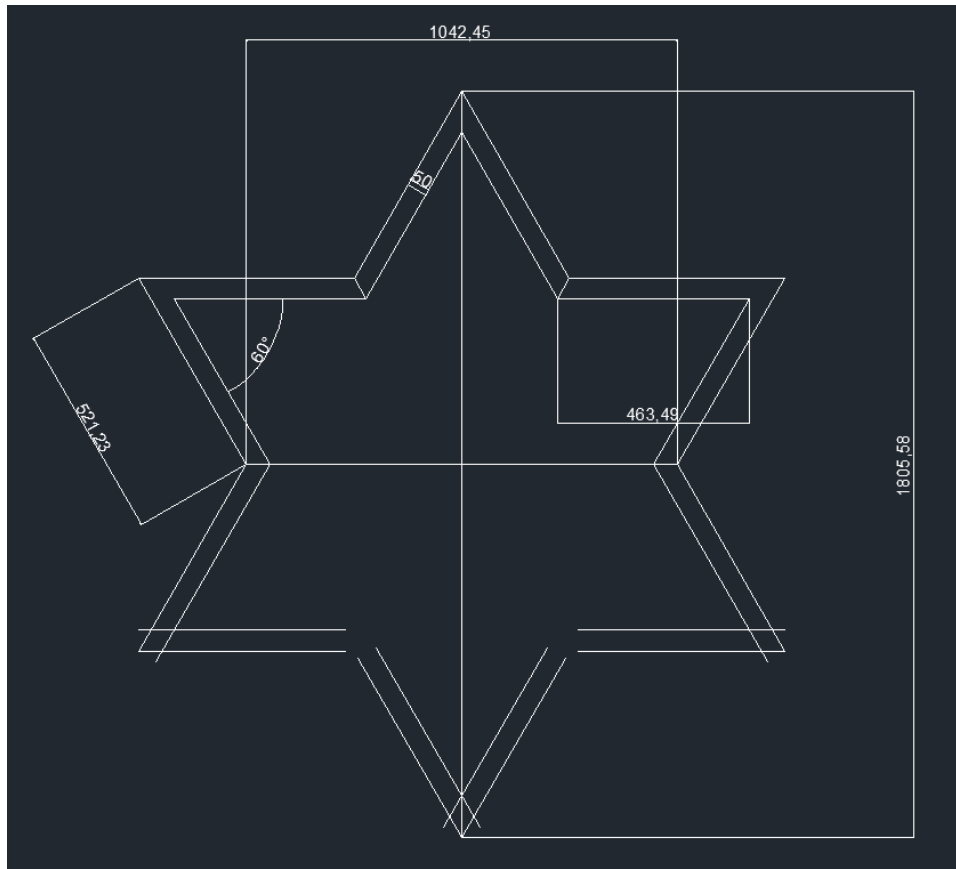

Width ?

Let us know the L and Width of installation

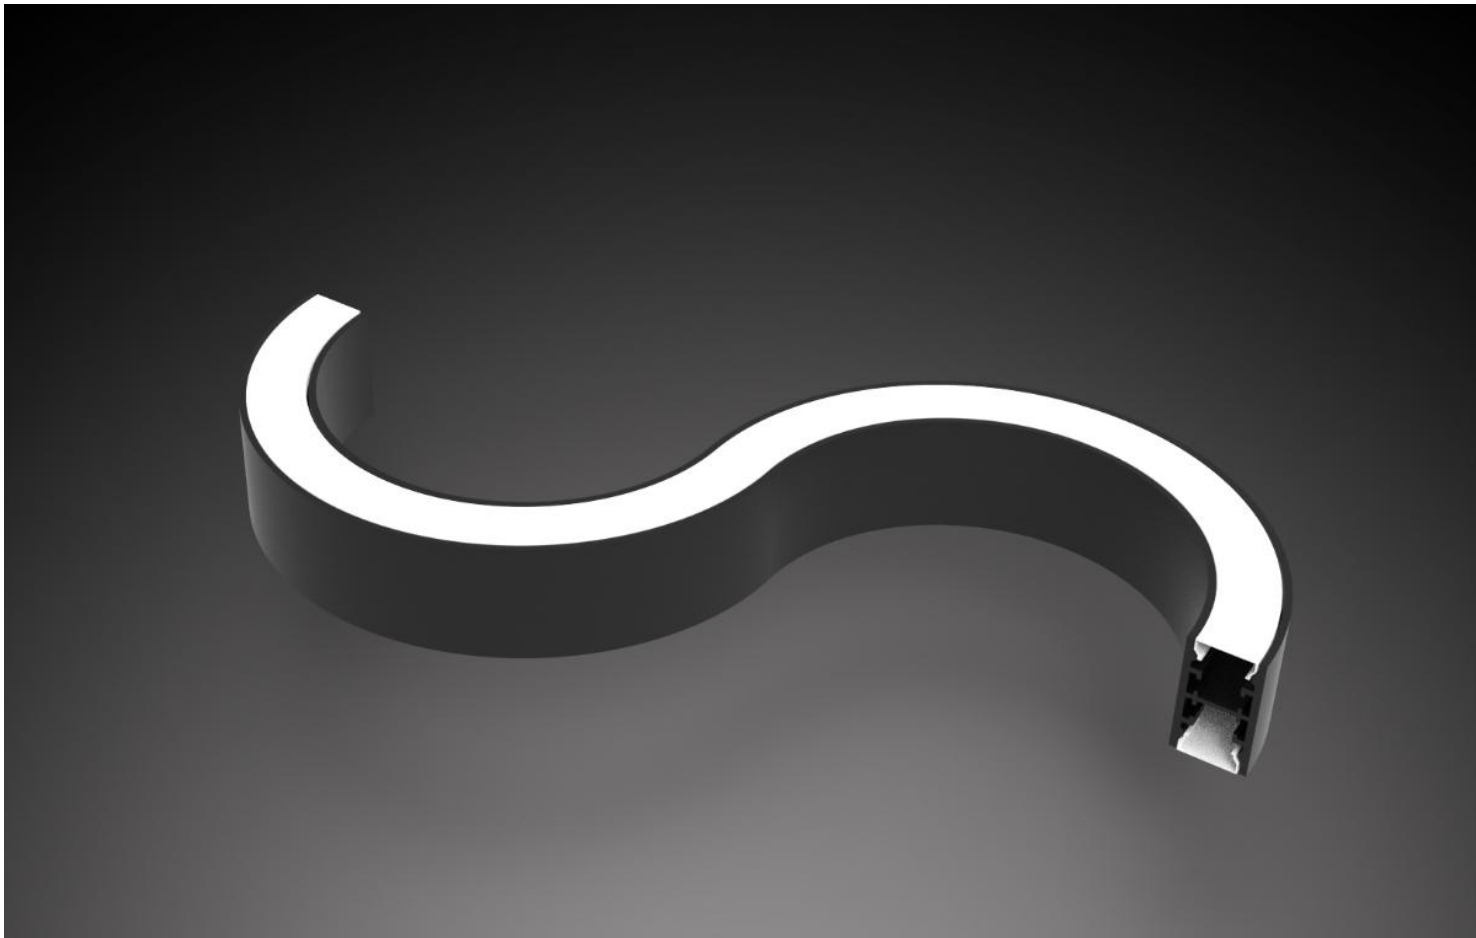

Here one real customization of LED Linear Light with a unique of shape

One CAD drawing of shape (our light designer will draw the draft for you, it marks well each size in details)

Before the sample is prepared or mass production to produce, we will provide service of 3D Renderings

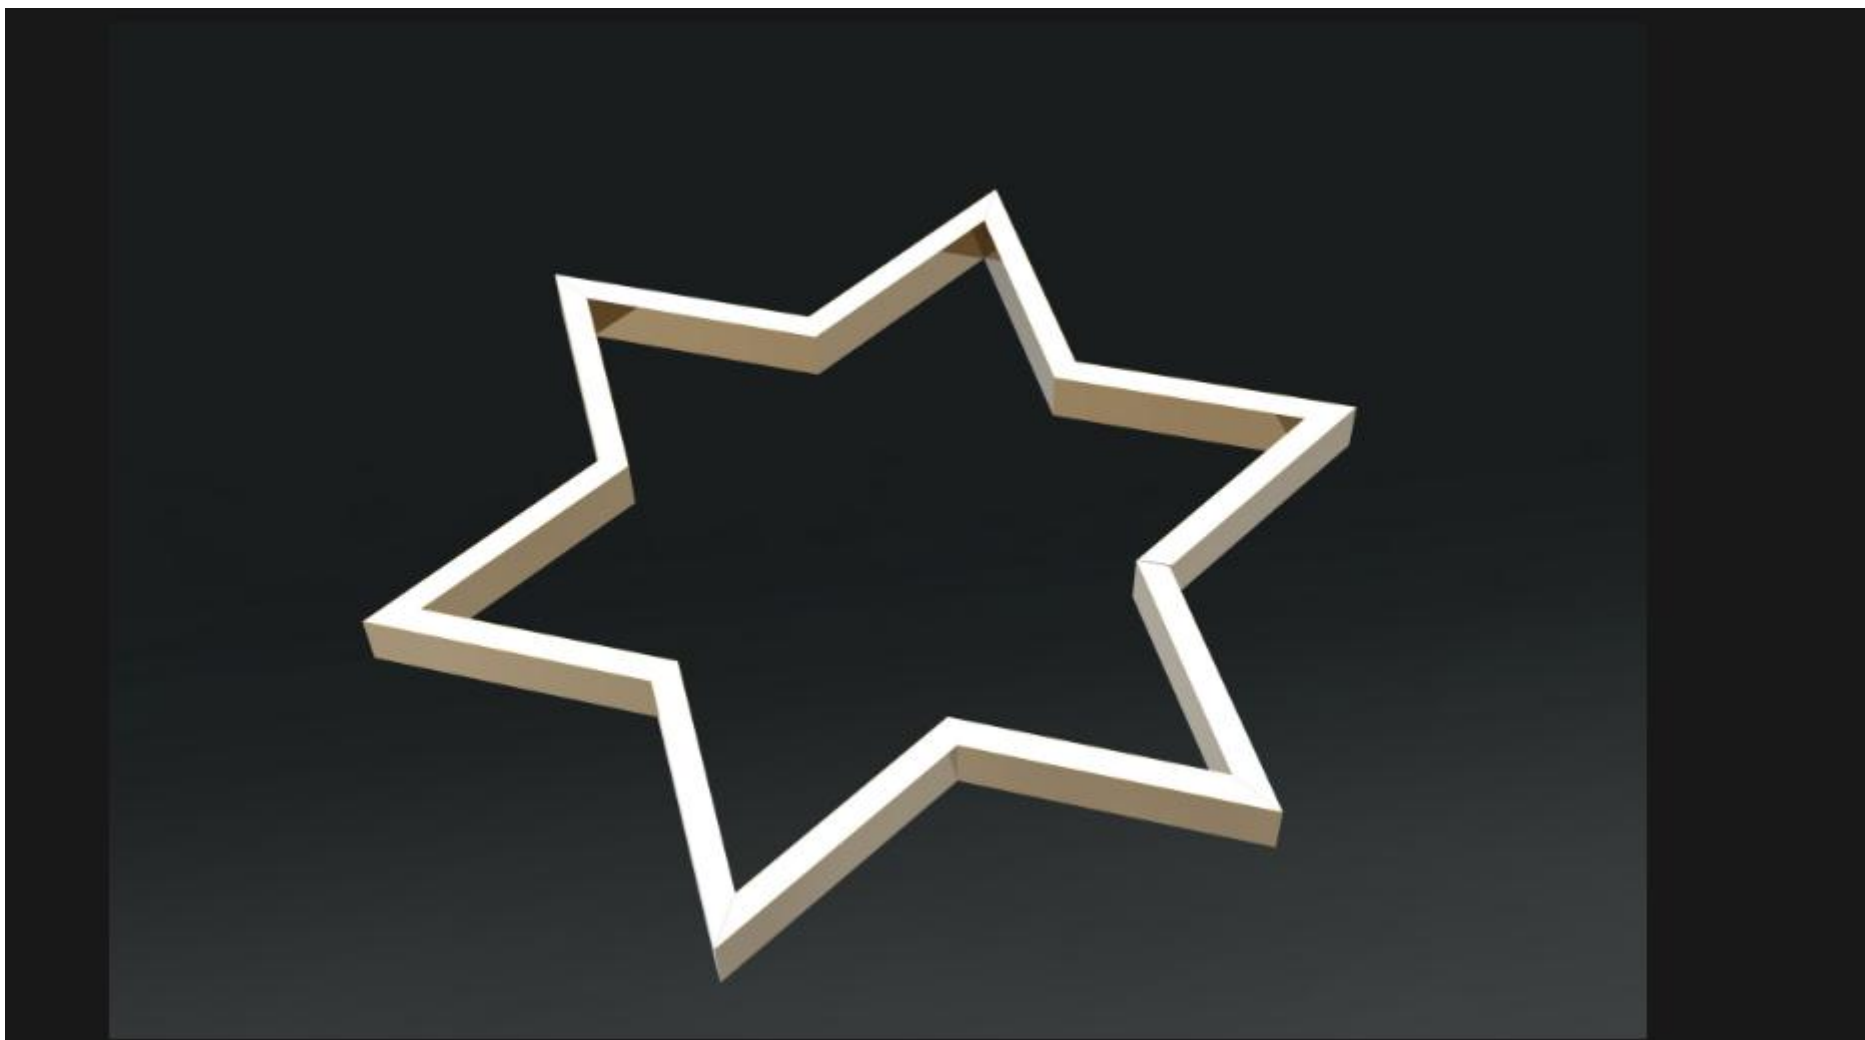

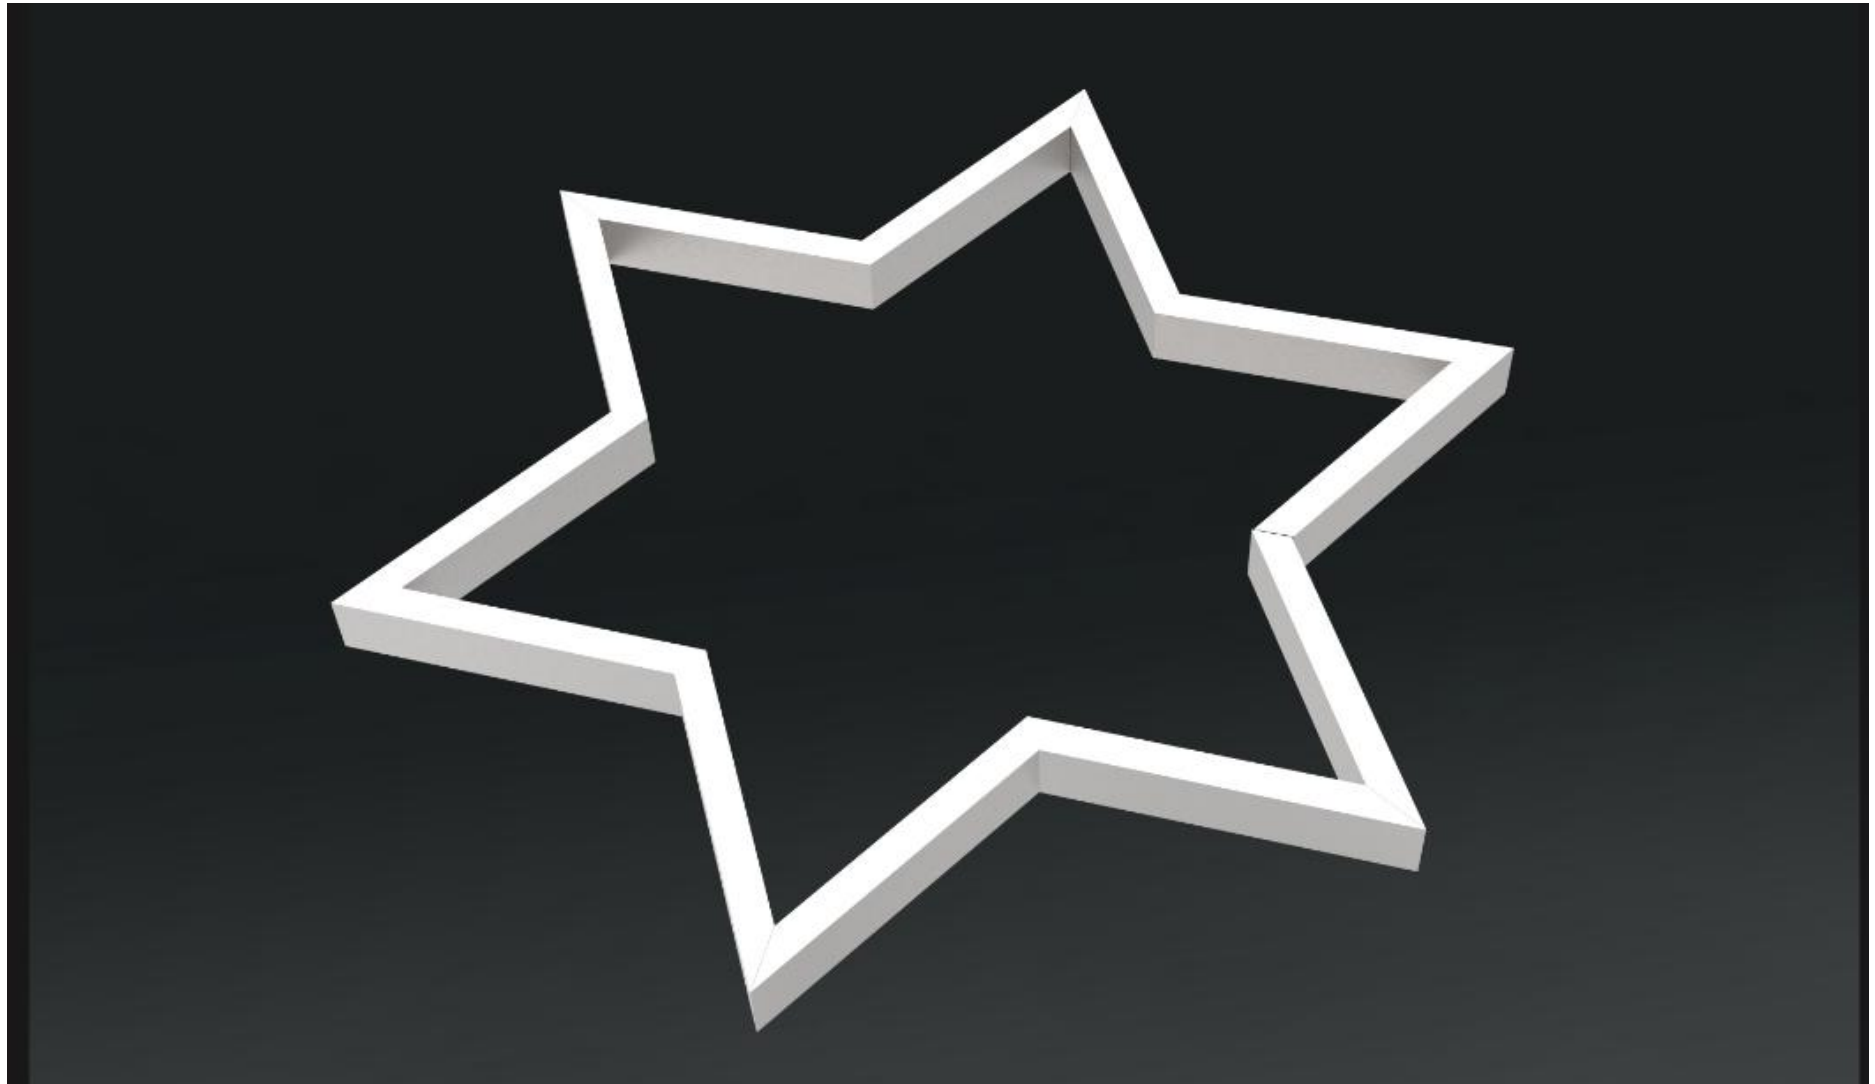

We will make some colors of option of 3D Rendrings satisfy more selection

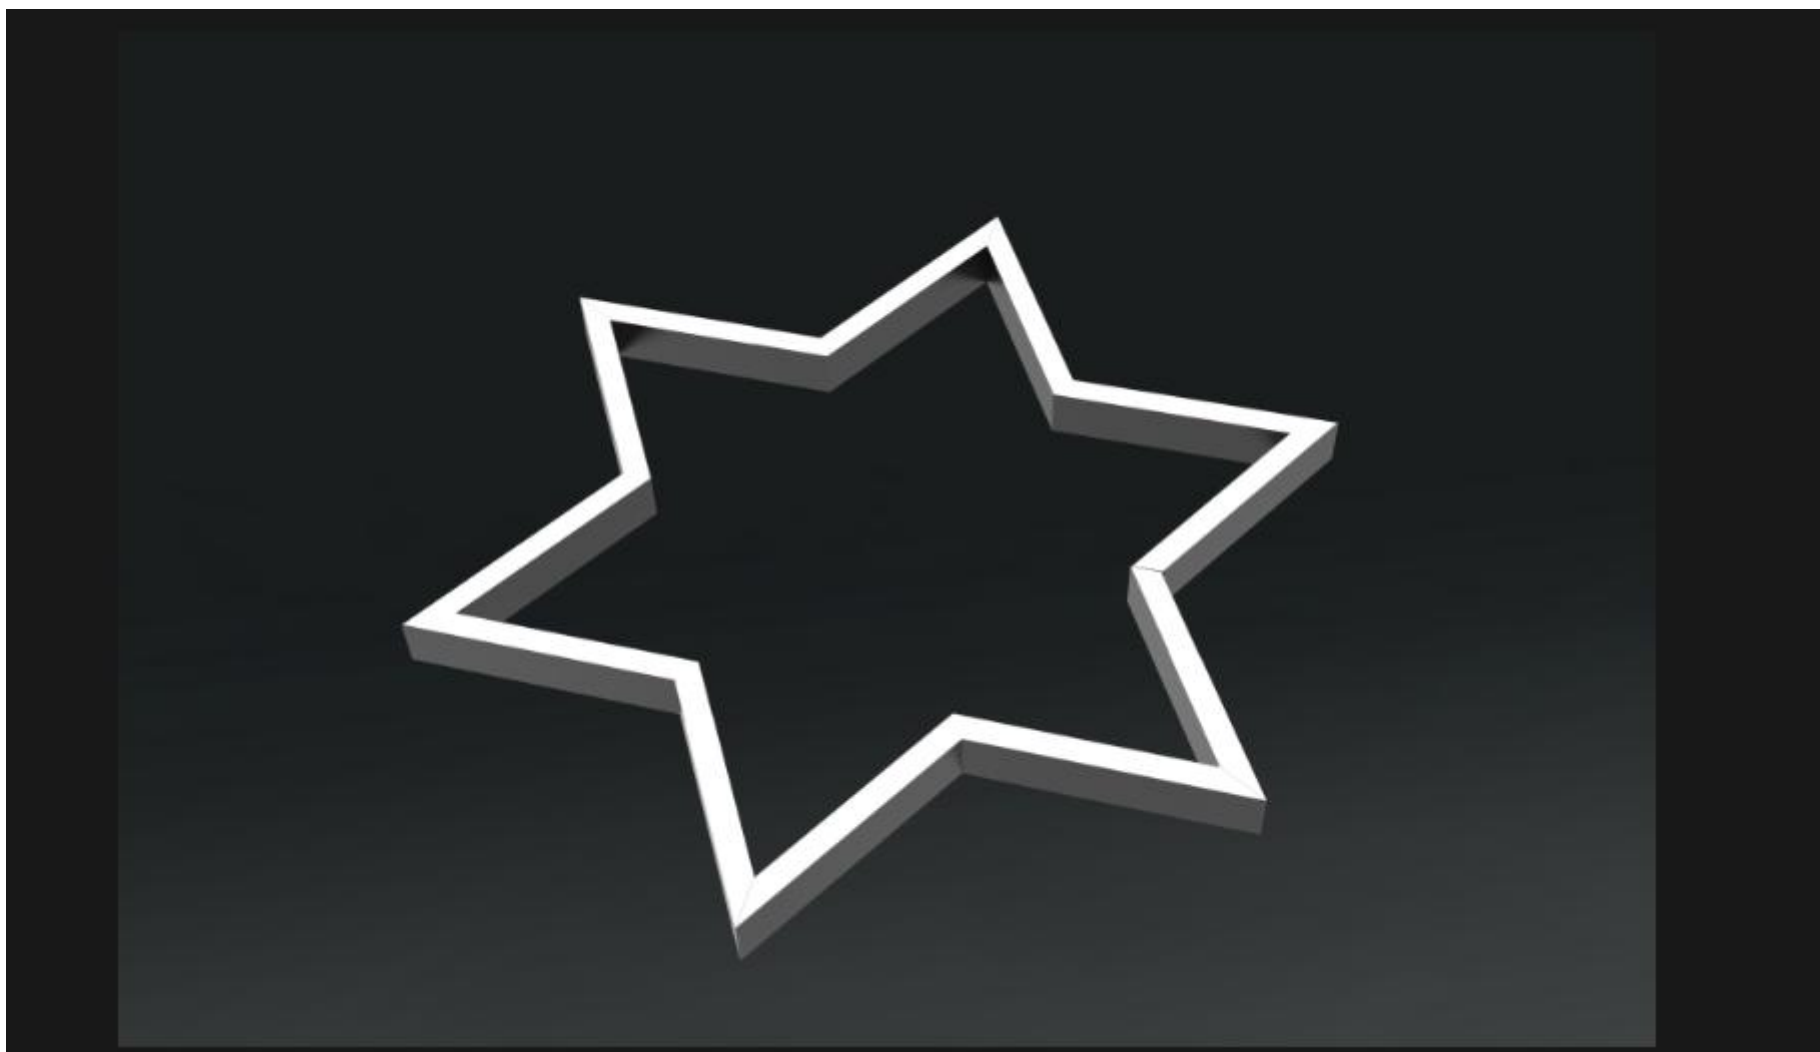

So, if you need these kinds of LED Light, you're welcome to contact us today.
